K7 Green Wellness Village Model

The **K7 Green Wellness Village** is more than just a residential complex; it represents a harmonious integration of environmental consciousness, community engagement, and wellness-centric amenities. Designed to cater to the growing demand for healthier living spaces that nurture both physical and mental well-being, these visionary developments are poised to become a beacon of sustainable living.

- **Renewable Energy:** Net zero carbon footprint real estate refers to properties that utilize a combination of energy-efficient technologies, renewable energy sources, and carbon offset initiatives to achieve a net zero carbon footprint. We build micro grids that harness renewable energy from the sun, store it in on-site batteries, and distribute it to power the entire multifamily complex.
- **Vibrant Green Spaces:** Residents are surrounded by thoughtfully designed green spaces that promote relaxation, outdoor activities, and a connection with nature for a stress-free living experience.
- **Community Engagement:** Community events promote a supportive and inclusive living environment.
- **Sustainable Mobility Solutions:** Green Wellness Villages often prioritize alternative transportation options such as electric vehicles with charging stations and easy access to public transportation, promoting greener commuting.

Best in Class - Build to Rent Smart Homes

Why Net Zero Communities?

Reduce utility cost & environmental footprint

- Consumers see direct utility savings
- Smart buildings with automation for better eco friendly amenities
- Create power reliance & backup to grid infrastructure at local level
- Track & validate carbon footprint & reporting
- Contracted subscription service with no upfront hardware costs

Smart Buildings Become Virtual Power Plants

- **Smart technology** - Power in the palm of your hand
- **Total home control** - Demand load manager
- **Monitoring** - Appliances, EV charging and all circuits
- **VPP control** - Energy storage, solar, renewables
- **IoT enabled** - Samsung SmartThings energy, Google smart energy, Alarm.com & more
- **Reporting** - Energy usage, vehicle kWh usage & blockchain verified carbon footprint

Smart Home IoT Integration
